Part 4.

Elderly people - are people who need to be taken care of. They have many problems with their health, sometimes they need people which they can talk and discuss news.

I think that it is a very good idea to make this technology. Because, sometimes family can't visit their grandmothers and grandfathers often they can't control them at the time. And this technology can help them very much. They can do their studies at home, work and in every moment watch on monitor and see their grandmothers and grandfathers.

This problem is really important, because new people have work, they are really busy to be with elderly parents. They have their problems, most have children and can't take care of grandmothers, grandfathers.

Elderly people must be taken care of and I'm glad that humanity leave it not the best place.

3/1/1/2/1

85

Nevertheless, the parliament doesn't take much care about them.

By the way, there are a lot of modern technologies that helps the elderly control them. To my mind, it's very important technology. I suppose that other countries should create the same things or import this new monitoring system from Japan.

So, Social System tries to support the elderly, but it isn't develop enough. Nowadays we do a lot of things to take care of elderly people. I believe in the future elderly people who live alone will get enough care to stay healthy and strong.]

Part 4.

Each country have many lovely elderly people. They don't have families or people who can take care of them. Mostly this people are happy.

I think they must have social help. Social services can send to this people special worker, who can help them. Also the government can create for them firms or hobby group, where they can find people with same interests.

In the one hand, this system is good. The elderly will not feel themselves lonely.

System have many noises. ~~It is awesome~~ ^{It is awesome}. But in the other hand, this noises don't be substitute real people. System can't solve their problems ~~or~~ ^{or} help them. ~~order~~

In the end, I want to say that we should take care of them. We must love and treat them.

1+2+1+1+1 = 30

In conclusion, I want to write that our elder grand people mustn't be alone and new technologies can help this people, and all countries must protect elderly people, because they - our history, our traditions and our parents.

Part 4.

I would like to write about elderly people. I think that elderly people must be alone, because all elderly people is mother and father, grandmother and grandfathers who must live in their family. But nowadays most of elderly people live alone, because their children don't want live together and care of about their parents. I know that young people has a lot of problem and few time for care of and that's why appeared new sound monitoring system, which will help elderly people. I think it is very comfortable system because now elderly people never be alone. I know, that this technology is refined enough to differentiate between the sound of a falling object or a collapsing human and can instantly alert family members or security firms if any abnormality is detected. But this system is not available for many country, and that's why was built house for the elderly, because this category of people need for help, and care. 2+1+1+1+1=65

Part 4
 It's generally agreed today, that elderly people living alone
 one of the most important social problems.

To begin with that elderly people shouldn't live alone. First and
 foremost they need our support with cooking, cleaning. They
 don't have enough forces because of their age.

Secondly they must be in society and communicate with
 their relatives. More over they'll be very often.
 Doubtless this system is very useful. It can help to
 track level of elderly people lives.

To draw the conclusion, one can say that elderly people
 shouldn't live alone. They need our help. They have rely on
 our support.

Part 4

Nowadays, young people are always busy and sometimes forget about their families. But elderly people need our help and care.

I think, we all should take care of our relatives, because they do lots of things for us, they love us. We must show them that they mean a lot for us.

There are new technologies even in taking care of elderly people in our modern world. For example, Japanese company created a new system, which can help us to know what's going on with grandparents even if you're far away from them. In my opinion, it's good compromise if you can't be near to your parents.

In conclusion I want to say that the best way to show your love and care isn't a new technology. It's just a call, visit,

Part 4. Now days the problem of older people living alone is very urgent.

First of all I think elderly people who live alone are lonely and isolated. Also many of them have problems with their health.

In my opinion it is great idea of observation technology. this will help at any time to check the safety of pensioners.

Part 4.
 I think all old people must be protected by a younger people
 Old people are weak and can't do some things without help
 As for me I'm ready to help old men or women, cause they worked
 hard all their life and gave us a good future.
 I agree that somebody hasn't had children or best friends.
 And they required quiet life without any troubles and we have
 to do all their wishes that they need. All housework and other
 things.
 In conclusion I can welcome to help and take care of all
 people that need it. We must invent special programs for it.

Part 4.

78% (315)

There are a lot of sick and old people, who need to be taken care of.

I think, we need to take care of them, because some of them did a lot for society.

I help my grandmother and advice you to do the same.

In my opinion, the way the author of the article thinks is wrong. Elderly people don't want to be taken care of from machines. They need somebody, not something.

Somebody, who can help and listen to them.

Somebody, who can feel...

Anyway, all ways to take care of our grandmothers and grandfathers is better, than doing nothing.

Part 4
 The ~~carrying~~ taking care of elderly people is important problem. Of course it is not so important, as a problem of a Global warming, but this problem ^{needs} the decision too. I think the idea with Japanese ^{technology} ~~technology~~ is good, and rather helpfull. Because old people ^{can't} ~~is always~~ hear and see such good, as young. And Robots with wick will hear the sounds, will help the old people. For example: ~~somebody~~ ~~came to your house, and your cat can't get inside, because you don't hear them, but the robot hears, and he will show you, what's the problem.~~ I think there are lots of different situation, in which ~~the this~~ technology will help. That's why I think that this idea should be realise. It will help the people, old people.

Writing

Everybody understands that elderly people who live alone must be taken care of.

I absolutely agree that we should help aged lonely people, because it is our duty. Old people have health problems, they get low pension and they can suffer loneliness. As for the new technology, I believe it is very necessary and helpful. First of all this system includes the possibility to monitor the sounds and noises in home. Then it can also detect dangerous moments, alert family and security about it. Finally this technology ensures the elderly safety.

To conclude, I want to say that ~~the~~ that this programme is a great technology which is available all over the world.

I think we should take care about alone people
Elderly people who live alone can be mentioned by new terminology their
analysis households seems to ensure their safety
Some people has family, brother's family will care alone.
We should have more time to do it. We can visit grandmother, when you have time.
We can help them in garden, then the land will be more difficult to plant.
She will be happy because we help her.

Part 4. Writing

I don't know where libraries appeared but I think they appeared in Egypt thousands years ago because people needed in new information, wanted to know something new and give next people history and knowledge. Some of my friends loves reading very much and sometimes take books in the library for some money. I often use to take a book in library when I need to read for my lesson. Modern libraries often do their visitors a lot nowadays: meetings with authors and interesting peoples, performances based on famous books. Nowadays popularity of electronic books is growing because it's very comfortable to read many books in one device.

but I think libraries will disappear because million of people prefer real books because if you can touch them, you feel its smell. In my opinion it is very easy to take a cup of chocolate and book winter evenings.

Libraries nowadays

The first libraries appeared in Babylon and Egypt ^{in order} to contain information, books. While the books existed, the libraries were popular. Nowadays we contain information in our computers, we find electronic books, we are able to read every book we want to read. But we need libraries ~~still~~, because we need to read paper books, it is more healthy than to use computers. I and my friends rarely visit libraries, generally to take schoolbooks or to get some rarely books. The modern libraries offer to their visitors not only books, but they also offer different old things to look at, invite different participants of different situations. I think we will make the same libraries in future, maybe they will have be more comfortable, have robots and to tell something about these books and they libraries will be able to move from one city to another. ~~I think~~ Libraries are very useful nowadays.

Hello dear reader,

Nowadays libraries aren't very popular with modern teens unfortunately. So nobody knows where libraries appeared but it's easy to guess why they appeared. People wanted to read more articles and different books.

Personally, I and my friends don't go to the libraries because we are too busy people.

Modern libraries offer to their visitors a lot of interesting books about different stories, so many fashionable magazines for teenagers and, of course, the opportunity to use libraries' computers and printers.

What about libraries of the future? I think there will be many new gadgets and technologies with an access to the Internet. Also there will be big collections of books.

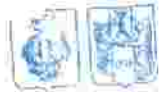

Well, I really want to appeal you to read more.

Visit libraries and take care of yourself.

Good luck,

Svetlana.

From:
Khabarovsk
Russia
22.09.16

My lovely newspaper! I think, that libraries will never disappear, because paper books will never disappear. So, if paper books will never disappear, they need to keep somewhere. But let's come back to the past.

I think, that first library appeared just because it was so many books, and there is no place to keep it, so, people decided to create a special place for books.

Of course, modern libraries have many differences between ancient libraries and modern. For example: modern libraries contain not only books, but there is content a few computers for students.

As for me, I am time to time visit library with my friend. We borrow a few books and then we give them back. So, what about libraries in the future? I guess, that in near future libraries will be the same.

So, libraries is the very powerful place, where contains so many knowledges.

With best wishes,
your reader

The first library was built in Egypt. It was thousand years ago. There wasn't any paper so people used plants. ~~After~~ Hundred years later a library appeared in Ancient Greece. The most popular ancient library was the Alexandria Library. Information was written on clay tablets.

Now there are some libraries too, but they aren't very popular. On the one hand, all you need you can find in the internet and I with my friends don't go to library. But on the other hand, some people ^{who} haven't got a computer can get a book in the library.

In our time libraries are comfortable and modern. There are a lot of different books here. It's simple to choose a good book. Some libraries have an internet catalogue.

To my mind, libraries are very important, but I think that in the future they will become not so popular than at the moment.

New libraries aren't popular with modern teens.
I think it happened because innovations and technology are more popular than books.

1. As for me, I know that the first library was appearing in Egypt. They didn't have paper and wrote on papyrus scrolls.
The biggest library in the world is Alexandriiskaya Library.

+ As ~~at~~ ~~the~~ ~~time~~, I usually go to the school library with my friends because I need ~~an~~ information for ~~my~~ presentations.

+ I know that modern libraries offer to their visitors a lot of new things (for example: computers, internet and so on).

+ I think that in future libraries won't be popular because the most of books will be in the internet.

+ To conclude I want to say if you read books you will know more new and interesting information.

Libraries are very popular with modern teens. As for me, I like reading ~~the~~ books because it is very interesting to learn new information. I have a lot of books ^{at} home but I like to visit the school library. In school libraries have a big and rich library. There are a lot of books of modern writers.

I know that the first library on the world was an Egyptian library. But in Egypt people were writing on the plants. The second library ^{was} situated in Ancient Greece. I know that the largest library in the world is the Alexandria library.

People all over the world reading the books but many of them take place books to e-books. It is very bad!

I think that the books are very important for future. People will save the book in future?

During our time libraries aren't very popular with modern teen, because teenage use telephones, modern convulsions and Wi-Fi. But why we can't reading book in library?

1) The first libraries were founded in Egypt. People didn't have a paper, and they used papyrus scrolls (plants). The largest library was Alexandrievskaya Library. ^{Nowadays} and this library is the largest library. In Ancient Greece were libraries too, but books were clay tables.
 2) I'm with my friend go to the school library, but I go in another libraries.

3) There is no doubt, that modern libraries are very popular nowadays, against many people like to go in old libraries.

4) I think, that future libraries will be very popular with teenagers. Books will be saved in computers, But I like just to read old books.

To conclude I want to say, that I strongly believe that libraries will become very popular in future. So reading books is very interesting for me and other good people.

Dear classmates!

We are going to go to a Spare museum. We will meet near our school at 9 o'clock. I think it is a good chance to collect some material for class project. I think you don't forget our class project. You have to take some money if you want to eat some "spare" meat balls. Take a pen, a notebook and a camera. Your parents need to pick you up at school at 7 o'clock.

Are you want to go with us?
I think you can't say no).

Dear classmates!

On Sunday we will go to the Space museum. Let's meet at 12:30 in front of our school. You must have to take with you a pass copybook for our class project. An excursion ends at 14:00 and we will arrive at school 30 minutes later. So tell your parents do pick you up at 14:30 near the school. The excursion will be very interesting and exciting and it will play big role in your life! So, please, take part in this event!
